

Smart Buildings Solutions

Smart Buildings Solutions

Cut energy bills by 30%, put more money back into your city's budget, and improve public safety— with Exe Holding technology for smart street lighting.

Founded in 2012 by a young, innovative and passionate team, highly interested in the field of energy efficiency, EXEGreen Holding, member of the Romanian National Commission for Illumination, has quickly evolved and became one of the leading companies in the industry of energy efficiency and LED lighting solutions.

Smart Buildings Solutions

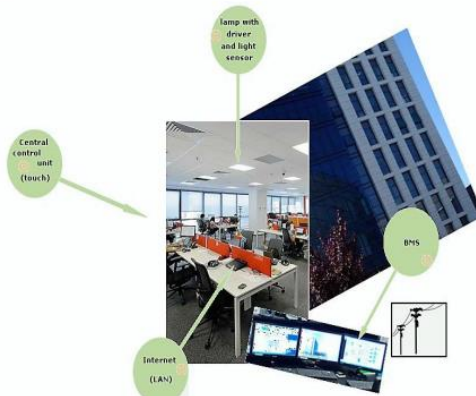

Operate more efficiently: IoT allows companies to work more efficiently and improve internal business processes - saving time, resources and money while improving productivity.

Improve customer experience: Businesses use physical object-based insights to tailor customer experience and ultimately increase customer satisfaction and loyalty.

Add new revenue streams: Companies are trying to grow their business by introducing new, differentiated and innovative solutions (products and services) on the market.

Smart Buildings Solutions

Connected Buildings

Local response rather than centralized
A network of independent subsystems
Few efficient
No autonomy

Intelligent Buildings

All systems in an interoperable network
Increased efficiency gains
Some capacities

Smart Buildings

Centralized response overlapped with external
Information and context data
A network with integrated and adaptive control
Efficiencies through real-time optimization
Predictive and proactive level of autonomy

Smart Buildings Solutions

Information system	Information management in the field of energy
Video Digital	Asset Locator
Security and control acces	Intrusion Detection
Smoke Detection	Fire Detection and Alarm
Environement Control	Internal air quality control
Light Control & Upgrading	Water and waste management
Mechanical aintenance and upgrading	Energy Supply & Load Management
HVAC maintenance services	On-site technical support
